

Pre-Trip Inspection Tool

Pbtransportation.com
701.221.2465
1807 Revere Dr.
Bismarck, ND 58501

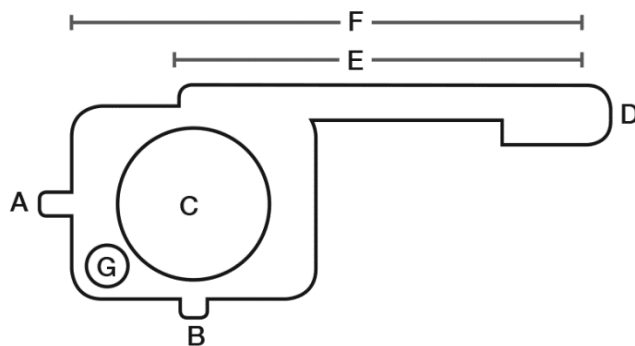

The Pre-Trip Inspection Tool Performs the Following Inspections:

- Brake pad thickness
- Brake stroke
- Tire tread depth
- Windshield cracks

The Pre-Trip Inspection Tool Includes:

- Brake shoe thickness gauge to assess wear and need for replacement
- Brake stroke indicator for regular brake maintenance checks
- Legal tire tread depth measurements to meet safety standards
- Windshield damage evaluator for detecting chips or cracks that may require attention

The Pre-Trip Inspection Tool Dimensions:

- A. 5/32" Steer tire depth
- B. 3/32" drive and trailer tire tread depth
- C. 3/4" maximum size of windshield chips
- D. 9/32" brake shoe thickness
- E. 2" maximum stroke for short stroke chamber
- F. 2-1/2" maximum stroke for long stroke chamber
- G. Keychain hole

*Note: Measurements for A, B & D are set 1/32" greater than the legal requirements to allow driver to take corrective action before the vehicle is out of compliance.
